## AUTOMATIC HUMIDIFIER

The Best Cure For Dryness®

**The world's first computer-equipped,  
completely automatic humidifier.**

When you heat your home, the relative humidity of the indoor air plummets to the point where a variety of problems can occur. This low humidity makes you feel uncomfortable, takes moisture from your home and its furnishings, decreases the energy efficiency of your home, and can cause physical aggravations. The Aprilaire® Automatic Humidifier protects you and your home from these damaging effects of dryness.

- Eliminates dry nose, dry throat, and itchy skin.
- Reduces static electricity.
- Reduces heating costs because you feel warmer at lower temperatures.
- Proper humidity helps repel upper respiratory problems caused by excessively dry air. Ask your doctor.
- Protects your home and furnishings from damaging dryness and shrinkage.

As the world's first computer-equipped, completely automatic humidifier, the Aprilaire Automatic Humidifier features an exclusive automatic "no-touch" computer operation that eliminates the need for constant manual

adjustments. As a matter of fact, tests show that it is three times more accurate and four times more reliable than other humidifiers.

**An Aprilaire Automatic Humidifier delivers 50% more.**

- **COMFORT** Aprilaire will deliver up to 50% MORE comforting humidity to eliminate dry nose and throat and itchy skin, while reducing static electricity.
- **WELLBEING** Up to 50% MORE humidity ensures optimum humidity levels that can help reduce the chance of upper-respiratory problems caused by dry air. Ask your doctor.
- **PRESERVATION** Your home and furnishings are protected with up to 50% MORE moisture, which saves them from damaging shrinkage due to dryness.
- **ENERGY SAVINGS** 50% MORE moisture means you'll feel warmer with lower, energy-saving indoor temperatures.

There's an Aprilaire humidifier for any heating system. Your humidifier will be professionally selected and installed by your heating and cooling contractor based on the size of your home, type of furnace, and many other factors that contribute to performance.

## HIGH EFFICIENCY AIR CLEANER

Nobody Makes Clean Air Easier®

**The economical, trouble-free, high efficiency air cleaner for your home.**

The trapped air we breathe in our homes can be loaded with dust, pollen, spores, and other pollutant particles. Combine that with the fact that we spend 90% of our time inside, and indoor air quality becomes a major concern. The Aprilaire® Air Cleaner provides you and your family with cleaner air throughout the home.

- Reaches 99% efficiency on particles five microns or larger.
- Provides allergy relief. Ask your doctor.
- Lifetime limited warranty.
- Filtering media lasts one to two years.
- Protects heating and cooling equipment.
- Absolutely silent operation.
- Requires no service calls.
- Reduces cleaning of home and furnishings.
- Uses no electricity.
- Produces no ozone.

## ZONE CONTROL SYSTEM

Custom Comfort Throughout Your Home®

**The most reliable way to achieve temperature control in every area of your home.**

Room-to-room temperature variation is a common problem in new and old homes. A heating and cooling system monitored by a single thermostat does not have the capability to provide controlled temperature conditions throughout an entire house. The single thermostat primarily controls the temperature in the room where it is located, and as a result, other parts of your home can become too warm or too cold.

Homes that have zoned heating and cooling systems are simply more comfortable homes. In a zoned house, each zone is controlled by its own thermostat. This allows you to choose a temperature setting for each area of your home and control the amount of conditioned air supplied to those areas. By regulating air distribution, the Aprilaire® Zone Control System helps provide you with the most comfortable indoor temperature environment possible.

- Provides you with the flexibility to heat and cool areas of your home based on your family's lifestyle.
- Enhances the value of your home.
- Can reduce energy costs by as much as 20%.

## ELECTRONIC THERMOSTAT

Energy Efficiency Never Looked So Good™

**Ultra-thin, easy-to-use digital, programmable, and communicating controls featuring pinpoint accuracy.**

No home should be without the convenience, comfort, and energy-saving features of an electronic thermostat. That's why there is an Aprilaire® Electronic Thermostat that is right for any home, and any budget. It provides the added benefit of its award-winning design which means it will look great on any wall in your home.

Aprilaire digital models are easy to set and read. Programmable models automatically adjust indoor temperatures according to your lifestyle. Communicating models enable you to control all HVAC equipment from a centralized personal computer. All models feature pinpoint accuracy that will save you energy and money. Aprilaire Electronic Thermostats provide the perfect combination of engineering, performance, and beauty. Best of all, program memory cannot be erased due to power outages.

- Saves energy and energy costs through pin-point accuracy.
- Ultra-slim, attractive vertical design to enhance any decor.
- Provides ultimate comfort and reliability through state-of-the-art engineering.
- Easy-to-set, easy-to-read controls.

## ENERGY RECOVERY VENTILATOR

Only The Freshest Homes Have April Air™

**Your best value for a constant, controlled supply of fresh air with energy-recovery.**

In an effort to save energy costs, we have tightened up our homes with better construction methods. While this has made our homes more efficient, it has also made it nearly impossible for homes to "breathe" – to expel stale polluted indoor air and exchange it for cleaner, fresher outdoor air. This is the very reason for the development of the Aprilaire® Energy Recovery Ventilator. It is the perfect way to supply fresh air to your home with minimal energy loss.

- Provides a constant, controlled supply of fresh air to your home throughout the year.
- Reduces unhealthy indoor air pollutants, such as radon, formaldehyde, smoke, and odors.
- Reduces air conditioning load by removing excess moisture from incoming fresh air during the summer.
- Reduces excess moisture content.
